*Classic Chemicals*

## Profile:

Classic Chemicals is an agri-biotech company specializing in research, development, manufacturing and marketing of solutions that enhance crop and animal health, provide protection and increase yield. Classic was established in 1995 and currently operates a state-of-the-art manufacturing facility and laboratory 15 km outside of Rajkot, India.

We offer contract research and manufacturing capabilities with full range of services covering all aspects of product development and commercialization. We are committed to providing highest quality products, cost effective solutions and just-in-time delivery. We believe in innovation and establishing benchmarks of excellence in research, manufacturing and quality.

### **Mission :**

- To become global leader in chemical and biological technologies by application of science in research, development, manufacturing and sales of crop and animal health products that promote health, protect against diseases and improve yield
- To continuously grow and improve by innovation in the areas of our expertise
- To maintain excellence in our markets by providing highest quality of products and services to our customer through technology, innovation, regulatory compliance and expert workforce
- To invest in and develop our employees to help them reach their aspirations
- To become good social citizen by protecting environment, providing safe workplace and improving quality of life in the communities we operate in
- To make fair profit to sustain our growth and return for our shareholders
